

Oh, So Steamy! Steam Generator Car

Our first run is completely sold out. You still have time to order these second run schemes!

Our HO Scale "Oh, So Steamy!" Steam Generator Car actually generates a steam effect and expels it through the "Separator Blow-down Funnel" on the bottom of the car. Hook it up behind your locomotives, turn on the steam, ease the throttle, and watch as steam wisps out from underneath your passenger cars, just like it did on the real thing. The steam is non-toxic and actually cleans your track!

The "Oh, So Steamy!" Steam Generator Car also features working backup lights and EVERY pipe that is underneath the prototype — we banged our heads on the real ones enough times to know. It works on DC and DCC layouts and includes beautiful, accurate BX express trucks. The Rapido Steam Genny is a must for any railroad that operated passenger trains in cold weather. Still only \$59.95.

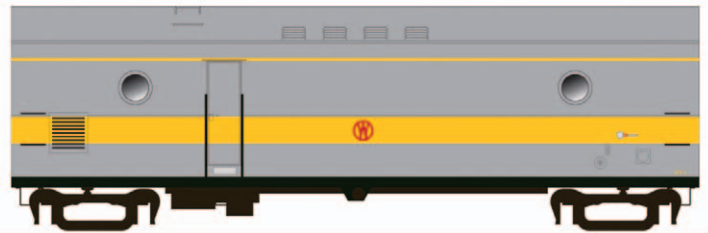

Algoma Central (silver) – 107160-163 (4 numbers)

Denver & Rio Grande Western – 107164-167 (4 numbers)
